Trigano opens a new production site for vans

To meet the strong demand for motorhomes, Trigano opens a new production site. This site manufactures exclusively converted vans whose success is significant on the market. It is located in Italy in Paglieta (Abruzzo), a few kilometres from the current factory and that of the chassis supplier Fiat. Production started on August 31, 2020.

The capacity of this new 10,000 m² plant is 4,400 vehicles per year, which will be gradually reached during the financial year. A possibility of further expansion exists. Trigano therefore increased its production capacity to nearly 10,000 vehicles on both sites.

This investment, planned and initiated for 18 months, is perfectly in line with recent market developments related to the advantages of motorhomes in terms of health safety.

The motorhome allows you to control your environment and your contacts with the outside world and makes mobility possible in complete safety while being at home anywhere.

2019/2020 annual Sales should be published on 23 September 2020
